ATNX

THE ATTENTION ECONOMY EXCHANGE

Memecoins proved demand

but they are flawed.

01 **Being right still loses**

The meme keeps growing. The dev dumps and the chart never follows.

02 **A hundred coins per meme**

Spot the trend, pick the wrong ticker, lose anyway.

03 **They are inefficient**

Thousands of dollars are lost forever in every abandoned pool. Over $100M a year.

98.6%

of meme tokens end up essentially worthless.

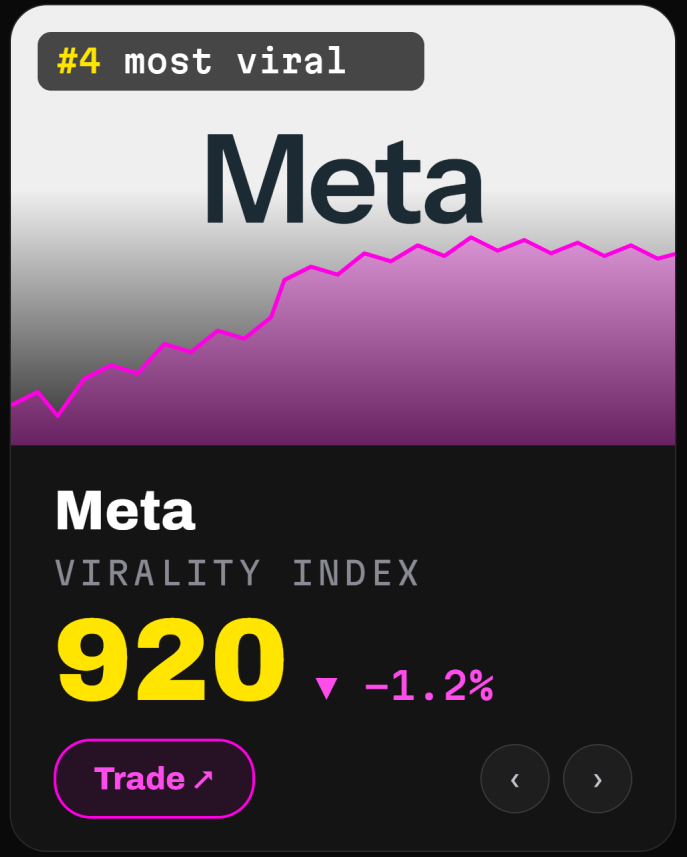

ATNX

ATNX: A permissionless exchange where you trade attention itself, not tokens.

THE ATTENTION ECONOMY EXCHANGE

1. Capture anything
2. Long or Short
3. Profit for being right.

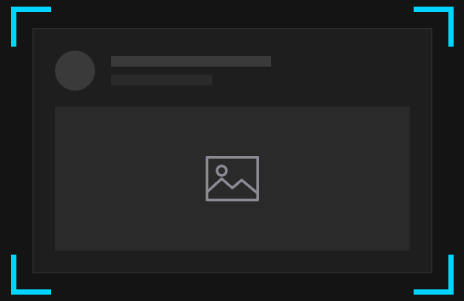

ATNX

If you can share it, you can trade it.

Stop sending memes to friends who don't open them.
Send them to ATNX and trade them.

01 Capture it

One shortcut in your browser, or the share button on mobile.

02 Send it to ATNX

ATNX recognises what you captured and opens its market.

03 Trade it

It becomes a market on its Virality Index. Go long or short.

ATNX

Attention, quantified.

01 Deduping and filtering

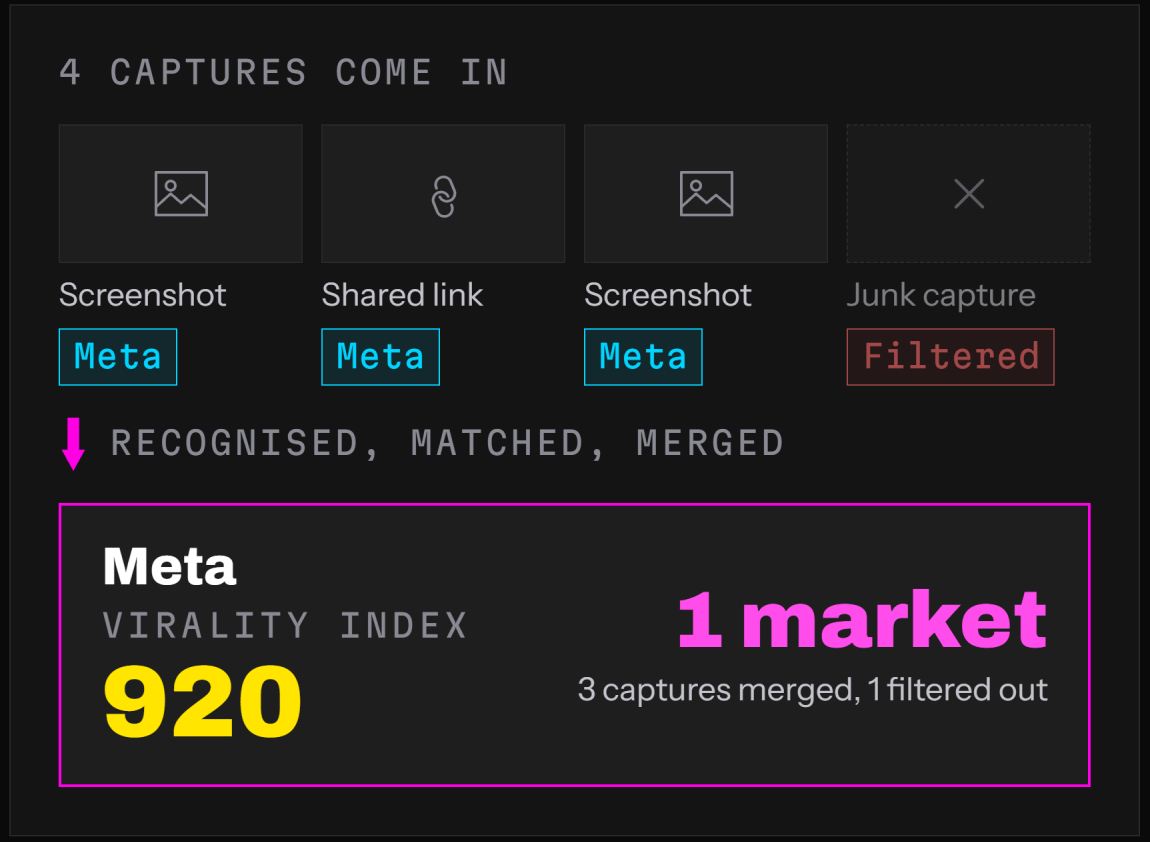

Every capture of the same thing lands in one market. Junk never gets listed.

02 Many sources, one number

Search, news, video and social signals, read together. More accurate, and harder to game.

03 Built on Stanford research

"The Structural Virality of Online Diffusion"
Goel, Anderson, Hofman, Watts (2016)

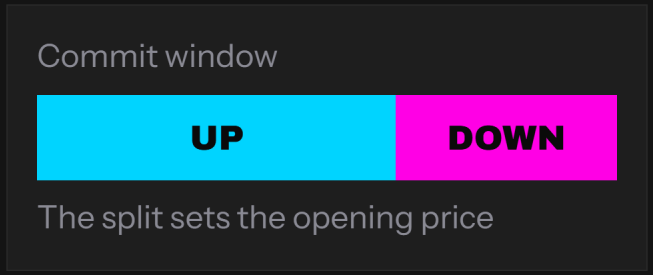

ATNX

How a market works.

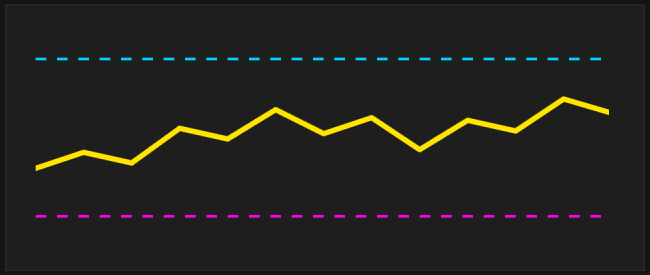

Standing on the shoulders of giants.

01 Presale

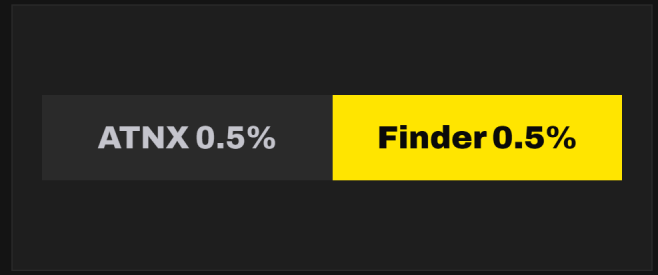

Every new market opens with a short commit round. Backers pick UP or DOWN, and their money seeds the pool.

02 Perpetual market

Then it trades nonstop. Go long or short on the Virality Index and get in or out whenever you like.

03 Shared 1% fee

Every trade pays a 1% fee, split 50/50 between ATNX and whoever opened the market. Scrolling pays.

ATNX

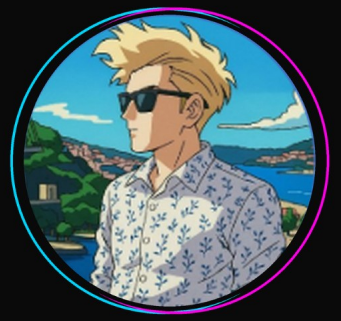

Who are we?

Marin

Co-founder

@0xczarsol

Silvio

Co-founder

@dedbif_sol

01 **Full-time and committed**

Both of us are all in on ATNX.

02 **Six figures of trading experience**

On token platforms and prediction markets. We know first-hand what needs fixing.

03 **$450K revenue from previous projects**

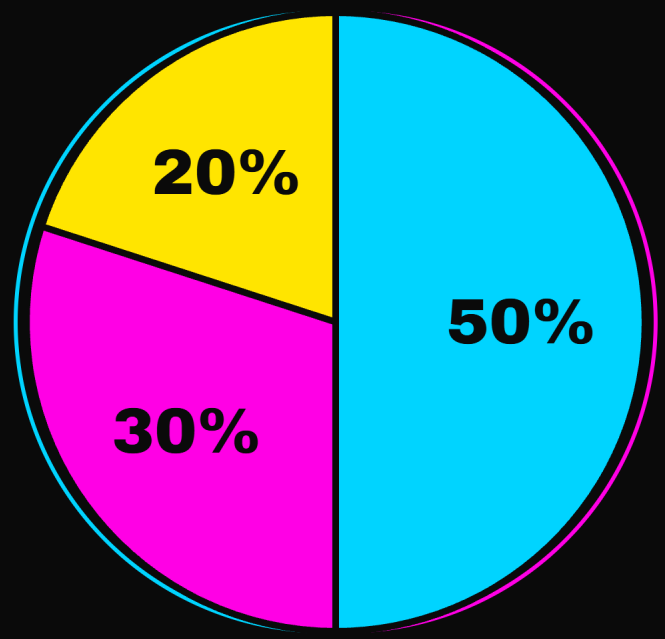

We have been through finding product-market fit before.

ATNX

$250K

Accelerator pre-seed, split three ways.

Development + audits	50%	$125K
Marketing + user acquisition	30%	$75K
Seeding early markets	20%	$50K

ATNX

Thanks for watching.
